

# HOW DATA IS CHANGING EVERYTHING

People in Silicon Valley say “data is the new oil.” Corporate America, scientific research, and all levels of government are being transformed by big data. This talk will cover how data is at the heart of today’s tech disruptions and new business models. Learn how the big data paradigm shift is changing the skills that business owners and employees are developing to get ahead. Also, FSC students in all majors will gain insights to understand and cope with the dramatic impact that big data has on them and on other people’s lives.
