Plan Technical Industrial Courses at Farmingdale

Farmingdale, July 5—The Long Island Agricultural and Technical Institute, formerly the State Institute of Agriculture, is introducing new technical - industrial courses which will be available to veterans in Nassau and Suffolk counties this Fall. High school graduates may also take the courses which are for two years.

The subjects to be taken up are: building construction, highway and bridge construction, aircraft manufacture, aircraft maintenance and operation, electrical equipment with industrial electronics, industrial chemistry, refrigeration, heating and air conditioning, industrial instrumentation, metal products design, production and inspection, technical dental service, food administration, power laundry and dry cleaning, advertising art and design and radio and communication.
