

Here's your opportunity to turn the earth's energy into your business-building tool.

YOU'RE INVITED TO BECOME A CERTIFIED GEOTHERMAL INSTALLER.

GAIN A HOT NEW ACCREDITATION. SAVE A COOL \$655!

For the first time ever, PSEG Long Island is partnering with Farmingdale State College and New York Geothermal Energy Organization (NY-GEO) to offer an International Ground Source Heat Pump Association (IGSHPA) Certified Geothermal Installer workshop. As sponsors, we are able to slash your cost of the certification from \$1,250 to just \$595.

RESERVE NOW!

HARNESS THE FUTURE OF ENERGY.

Ground source heat pumps have been endorsed by the Environmental Protection Agency (EPA) as among the most environmentally friendly, energy-efficient systems available. This should be Certified Accredited Installer (CAI) accreditation enables you to capitalize on this innovative technology, while increasing your competitive edge in the marketplace.

THREE DAYS OF TRAINING. A WEALTH OF NEW SKILLS.

The workshop will be held on September 26th through 28th at Farmingdale State College's Renewable Energy and Sustainability Center. It is designed to train contractors, engineers, architects and developers — virtually any professional who seeks to learn how to install these money-saving systems. Participants also earn Continuing Education Units (CEU) for Engineers through International Ground Source Heat Pump Association (IGSHPA).

THE BENEFITS ARE UNLIMITED. BUT ENROLLMENT ISN'T!

Seating is limited for this important and very timely workshop. Register today to reserve your spot and put the energy of the earth to work for you.
